

# What Material Should You Choose?

## Self Adhesive Vinyl

A flexible PVC with high tack adhesive backing. Suitable for internal and external use. To ensure best results always make sure the signs are fixed onto a smooth, clean, non-porous surface.

## Rigid PVC Plastic

Available in various thicknesses, for internal and external use. All standard signs are 1mm thick.

## Foam PVC

Suitable for internal and external use and available in various thicknesses. Typically used for double sided hanging, projecting and skiphook signs. Lightweight and durable, available in various colours.

## Photoluminescent

Charged by ambient light, these signs immediately illuminate in sudden darkness. An excellent material for way-finding and fire equipment signs.

## Aluminium

For internal and external use, excellent longevity in normal environmental conditions. Can be used for a prestige look when finished in a Satin Anodised Silver or Brushed Gold effect.

## Photo Polymer Braille and Tactile

Generally for internal use, external grade available at small additional cost. Aluminium backed material makes for a really durable sign.
